

What's New! Arlingtonpermits.com becomes more mobile-friendly starting Thursday, July 8th!

The City of Arlington is continually working to improve the Arlingtonpermits.com permitting site to provide a better customer experience! On July 8th, we are introducing an improved mobile device site! These changes will provide a simplistic design with streamlined navigation. Smart phone and tablet users will notice optimized service when scheduling inspections and applying for licenses or permits. These updates should allow easier reading of permit status, navigation, payments, and inspection scheduling on your mobile phone while at the job site and in your mobile office! Even shorter, simple permits, such as garage sales can be applied using your mobile phone!

What's new:

- Improved design for mobile navigation.
- Pages adapted for smaller screens.
- Combined the landing page and login screen.
- Important notifications are more noticeable.
- Redesigned permit groupings by permit numbers and address to easily request inspections.

What will stay the same:

- Logging in to view permits status, registrations, and scheduled inspections.
- Applying for permits, contractor registrations, paying fees, requesting inspections.
- Functionality of the site will remain the same.
- Desktop users at the office may also notice some subtle upgraded changes and better organized content.

Helpful note:

- If changes are not seen or things not working correctly try clearing your cache ([How to Clear my Cache](#)).
