What's New – New Reroof Permit Application (March 10, 2023)**

**COMING SOON! NEW SINGLE, REROOF PERMIT APPLICATION**

The Planning and Development Services Department is continually working to improve the arlingtonpermits.com permitting site to provide a better customer service experience! We are introducing a new, single Reroof permit application. This new permit application will allow contractors to easily and quickly apply for Commercial, Single-Family Residential, and Two-Family reroof permit applications with ease.

General Contracting, New Home Builder / Remodeler, and Reroofing companies will soon have a new single, Reroof Permit application that will make it simple and easy to apply for a permit. Previously, contracting companies had to click through several screens before finding the correct application type – Residential or Commercial reroof. This process improvement will reduce the number of clicks to find the Reroof permit application, thus streamlining the application process!

**What's New:**

- A new, single Reroof Permit application for ease of use.
- Quick and easy access to the Reroof application.
- Streamlined permit application process.

**What will stay the same:**

- Maintain an active General Contracting, New Home Builder / Remodeler, or Reroof contractor registration.
- Requires a Building Final inspection to close the permit.
- Complies with the current 2021 International Building Codes (IBC).

The new feature will begin: **Friday, March 10, 2023.**
